During weeks 5-7 of our Kindness Capstone Project we will implement our four different projects while also connecting with each other in class to both share successes and work through challenges that arise. Every Thursday and Friday are reserved for in-class work time.

### Weekly Objectives

Students will:
- Implement their Kindness Capstone Project.
- Document their progress in their kindness journals.

### Resources / Materials

- Paper and pencils

### Deliverables:

- Team Meeting with Teacher
- Daily Participation points

**KEEP LOGGING YOUR COMMUNITY SERVICE HOURS!**

### Share

**Discussion Starter:**
- What work still needs to be done beyond our Kindness Capstone projects?
- How can we continue the conversation in our community even after this class ends?

### Inspire

**REMANDER:** Every Thursday and Friday are official WORK DAYS. We do not always have time together with our entire project team. This in class time is extremely valuable and should be used effectively. If you choose to waste it socializing, you may NOT count it towards your community service hours and may be in jeopardy of not completing your project.

Each group must also meet with the teacher during either THIS or NEXT class period.

**Teacher:**
You will need to meet with each group during the next two class periods. Review the following:

- The end result of their project
- Their overall progress on their end goal.
- The documentation they have in place to track their progress, their struggles, their triumphs, etc.
- Any concerns they may have about how their project ended.

Now is a great time to remind each team that they are also responsible for individual reflection assignments and a team presentation. The documentation they have kept will be vital to both of these assignments.

### Empower

**Your options for independent work today are as follows:**
- Wrap up the Project Documentation in your Kindness Journal. You will need these notes for your reflection paper and presentation in the next several weeks.
- Work with your team to review this week's mini-goal and the overall project goal.
